

TO: All Interlake Mecalux Distributors

SUBJECT: NEW → Interlake Mecalux News & Radio Shuttle Brochure

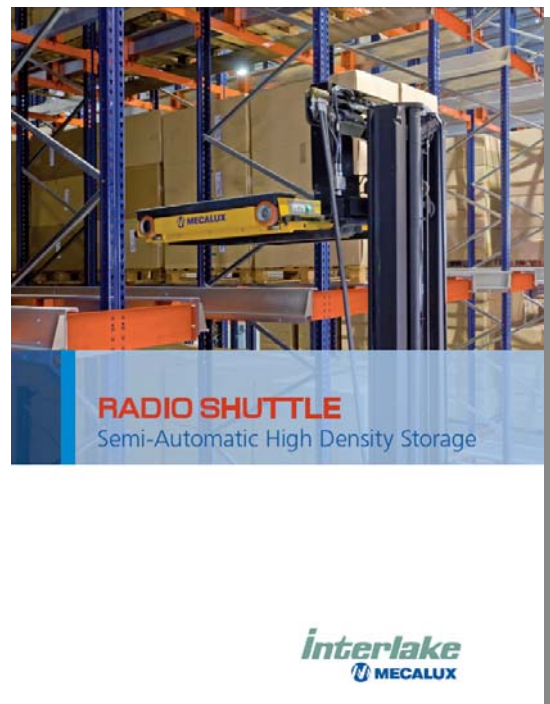

We are proud to announce the publication of the inaugural issue of our new material handling and logistics magazine, *Interlake Mecalux News*. This publication will focus on current trends, new products, technology, and supply chain solutions in the industry. We would like to invite you to send any suggestions and/or questions to our editorial team. Your feedback is fundamental to our publication remaining relevant. The Nov/Dec issue is currently available on-line and will be in print soon.

We have also recently launched a new product called the Radio Shuttle. Designed to be flexible and easy to use, the Radio Shuttle incorporates the latest in storage technologies. The system of semi-automated carts is ideal for high-density compact storage, cold storage, and buffers for temporary storage or prepared orders. Radio Shuttle carts can be used with existing pallets, forklifts and popular warehouse system designs. The brochure shown below is available in print and on-line.
